

Constant Pressure Valves

PRODUCT HIGHLIGHTS

WHY SPX FLOW?

The CPV constant pressure membrane valve is designed to ensure steady product pressures at the inlet or outlet of processing areas such as filling equipment, separators, homogenizers, heat exchangers, or pasteurizer systems. It is suitable for use in

the dairy, food, brewing and beverage as well as personal care and pharmaceutical industries.

FEATURES

- Simple design with few parts and no special tools
- Rubber supported TFM/ double layer membrane
- Precise connection between membrane and valve seat
- Wide range of Kv valves
- Two versions to keep constant pressure upstream or downstream of valve
- 3-A certified with smooth surfaces, no dead pockets, no crevices

BENEFITS

- Easy to maintain
- Long membrane life and durability
- Instant leak detection from product or air side
- Stable, accurate and responsive modulating control
- Excellent cleanability
